GRAMMER

Tight deadlines, heavy traffic, and high customer expectations regarding precision and just-in-time delivery make trucking a challenging business. To keep things rolling, seats from GRAMMER strengthen the backs of truck drivers worldwide. These highly innovative, ergonomic, and effective products ensure outstandingly comfortable sitting, significantly reduce illness-related absenteeism, enable sustained concentration for long stretches, and keep your bottom line intact with their excellent prices.

THE KINGMAN® MODELS. IDEAL FOR LONG HAULS.

Every truck has its trucker. To make sure that drivers can complete their trips without suffering from fatigue, stress, or tension, we designed the Kingman® High Performance seats in accordance with the state of the art in ergonomics. They therefore greatly improve working conditions while helping drivers stay healthy. The Kingman® High Performance seats have received the “Tested Ergonomics” label and are regularly certified as “highly ergonomic” by the Landesgewerbeanstalt Bayern (LGA) in Nuremberg, Germany in cooperation with the Ergonomie Institut München (EiM).

Kingman® seats are easy to adjust in many ways and adapt perfectly to every user, whether he or she is tall or short, slender or husky.

Every Kingman® seat is exceptionally user-friendly. Adjusting it is made easy by GRAMMER’s Design for Use concept: every control is placed to make it easy to reach and use, and it’s shaped to intuitively communicate its function and prevent confusion. The height adjustment feature additionally facilitates use. The Kingman High Performance demonstrates consistent ideal seat conditions due to its active climate system: cool and dry in the summer, cozy and warm in the winter.

KINGMAN® CLIMATE

Premium Seat with Active Climate System

The highest level of ergonomic comfort: the innovative suspension system makes for such a smooth ride that the condition of the road no longer matters and fatigue is effectively prevented, even after long hours at the wheel. The active seat climate system contributes to this wellness experience. A pleasant temperature in the truck cab is important for feeling good, but A/C isn't enough: drivers continue sweating where they directly contact the seat. The active climate system of the Kingman® Climate High Performance seat removes moisture so the user never again has to sit drenched in perspiration. On cold days, a seat heater provides cozy warmth.

An innovative suspension featuring the latest shock absorption and control technology: a friction-optimized system with enhanced strength and stiffness, resulting in longer life and exceptional comfort.

Key Features

(See the fold-out page for details)

Pneumatic Suspension

Automatic Weight Adjustment

Pneumatic Lumbar Support

Adjustable Shock Absorber

Fore/Aft Isolator

Active Climate System

Seat Heater With 2 Settings

The product shown may differ from the standard configuration.

KINGMAN[®] COMFORT

Certified Topnotch Comfort

Optimal comfort from an innovative suspension that integrates leading-edge shock absorption and control technology. The friction-optimized system features enhanced strength and stiffness, letting it last longer and delivering exceptional comfort.

Thanks to the GRAMMER Design for Use concept, the seat is intuitive to operate. Each control is located where you expect it to be, and it's uniquely shaped so you intuitively recognize what it's for and how to move it. This prevents mix-ups when adjusting the seat. The height adjustment feature provides additional ease of use.

KINGMAN[®] STANDARD

Experience the Comfort of Pneumatic Suspensions

In the Kingman[®] Standard seat, ergonomics and sitting comfort reach a new level thanks to flexibly adjustable suspension technology. The GRAMMER Design for Use approach to designing the controls additionally enhances its already-outstanding comfort and convenience. For an even more luxurious experience, the Kingman[®] Standard can be optionally equipped with comfortable armrests.

KINGMAN® STATIC

Reliably Comfortable Sitting on Long Hauls

The Kingman® Static ideally combines efficiency and ergonomics. Its intelligently designed comfort and superb safety features are rounded out by the integrated headrest and controls designed in accordance with the GRAMMER Design for Use approach. The Kingman® Static includes a neck cushion as a standard feature. Comfortable arm-rests are optionally available.

THE FEATURES IN DETAIL

Suspension Comfort

Pneumatic Suspension

The models with pneumatic suspension fully automatically adjust to the user's weight. Simply press a button to set the seat to the correct height. It couldn't get any easier than that!

Operating and Sitting Comfort

Automatic Weight Adjustment

The seat automatically adjusts to the driver's weight to ensure a relaxed, healthy sitting posture while working.

Pneumatic Lumbar Support

The pneumatic lumbar support with integrated infinite side support adjustment adapts automatically, quickly, and precisely to optimally support the user's back.

Fore/Aft Isolator

The fore/aft isolator minimizes vibrations when driving fast, when pulling trailers etc., or when traveling on rough roads.

Active Climate System

In hot weather, the active climate system removes moisture, aided by ventilation, from the seat to keep the driver pleasantly dry.

Seat Heater with 2 Settings

The seat heating with two settings provides cozy warmth in cold weather for comfortable driving.

Adjustable Shock Absorber

The shock absorber can be appropriately adjusted to different operating conditions.
